

# ROHAN BHATNAGAR

Data Scientist | AI/ML Engineer

Hyderabad, TS 500049 | +91 9406679018 | rohan.code2005@gmail.com | [LinkedIn](#) | [GitHub](#)

## PROFESSIONAL SUMMARY

Aspiring Data Scientist with hands-on experience building machine learning and NLP-driven solutions using Python, TensorFlow, and Scikit-Learn. Skilled in data pipeline optimization, predictive modeling, and BI dashboarding, with demonstrated impact reducing processing latency and manual effort in production settings. Passionate about applying data-driven insights to solve real-world business problems.

## TECHNICAL SKILLS

**Programming:** Python, SQL

**Machine Learning & Deep Learning:** Regression, Classification, Model Evaluation, ANN, CNN, RNN, LSTM, TensorFlow, Scikit-Learn

**NLP & Generative AI:** Tokenization, Embeddings, NER, Text Classification, LLMs, RAG, Transformers, Hugging Face, LangChain, AI Agents

**Data Analysis & Visualization:** EDA, Pandas, NumPy, Matplotlib, Seaborn, Power BI, Advanced Excel (Power Query, Lookups, What-If Analysis)

**Databases & Tools:** Milvus, GitHub, Redis, Beautiful Soup, Requests

## WORK EXPERIENCE

**Data Scientist Intern** | Naresh I Technologies

June 2026 – Present

- Developed machine learning models in Python and TensorFlow to predict safety risks with 92% accuracy.
- Automated data ingestion and preprocessing for 10K+ daily reports, reducing manual effort by 80%.
- Built Power BI dashboards to visualize safety trends and key performance metrics.
- Optimized data pipelines using Redis caching and XML processing, cutting latency from 8s to under 2s.

## PROJECTS

**Scalable Movie Recommendation System** — Apache Spark, ALS, AWS

- Designed a distributed collaborative filtering recommendation engine on the MovieLens 25M dataset.
- Implemented ALS-based model training for large-scale sparse data, optimizing resource allocation and accuracy.
- Deployed the model to AWS for batch inference and performance monitoring.

**Smart Document Processing Suite (NLP / RAG Application)** — Python, TensorFlow, BERT, Milvus, NLTK, Hugging Face

- Designed the end-to-end system architecture for a retrieval-augmented generation pipeline.
- Extracted and preprocessed text from PDFs; trained and tuned BERT models for embeddings.
- Set up and managed Milvus for embeddings storage and retrieval.

## EDUCATION

**Bachelor of Technology in Computer Science (AI Specialization)**

Aug 2023 – May 2027

Mandsaur University, MP

Coursework: Machine Learning, Artificial Intelligence, Cloud Computing (AWS), Data Mining, Big Data Analytics, Constraint Solving

## CERTIFICATIONS

- Generative AI Specialization — Coursera (In Progress)
